

Software Engineer Intern

ABOUT THIS JOB

Nielsen Global Media uses cutting edge technology and industry leading data science to tackle some of the hardest problems in marketing science. We're automating our models with artificial intelligence and machine learning to produce the same quality insights as a traditional white-glove consulting engagement at unparalleled speed and scale.

A LITTLE BIT ABOUT YOU

As a software engineer, you possess a robust aptitude, solid software development fundamentals, and effective communication skills. You have a passion for technology and thrive in a collaborative environment. You are eager to contribute to a dynamic team focused on developing an ambitious product. This role presents an opportunity for you to kickstart your career by engaging in projects that involve the latest advancements in big data, cloud technologies, and web applications.

QUALIFICATIONS

- Bachelor's degree in Computer Science or a related technical field, or equivalent industry experience.
- Solid understanding of Data Structures and Algorithms, as well as Computer Science Fundamentals including Networking, Databases, and Operating Systems.
- Experience with web applications or cloud infrastructure is a plus.

Key Responsibilities:

- Collaborate with a diverse team to design and develop innovative software solutions.
- Apply your knowledge of data structures and algorithms to optimize product performance.
- Gain exposure to state-of-the-art technologies in big data and cloud computing.
- Contribute to the development and enhancement of web applications and cloud infrastructure.
- Communicate effectively with team members to ensure project success.

Why Join Us:

- Opportunity to work on challenging projects at the forefront of technology.
- Supportive work environment that encourages professional growth and learning.
- Competitive compensation package and benefits.
- Chance to make a meaningful impact in the field of marketing science.
